Devorah Sperber (American, b. 1961)

Holodeck: Simulation Program, 2007-2008

9,600 spools of thread, stainless-steel ball chain

149 x 95 inches

2009036/MSA3002374

Devorah Sperber's installations comment on technology and human perception and subjective reality. This work reconstructs the door to the Holodeck from thousands of spools of thread, which appear to recede into distance. Sperber uses optical illusions to present her subject matter – the Holodeck is a simulation of virtual adventures throughout the series.

HoloBeam – Immersive Telepresence

Real-time volumetric video streaming and on-demand playback of recordings

ESA UNCLASSIFIED For Official Use

Author | ESRIN | 18/10/2016 | Slide 9

European Space Agency

HoloBeam – Immersive Telepresence

Easy setup with just one depth camera and one Mixed Reality device

HoloBeam – Immersive Telepresence

On-demand playback of volumetric recordings with dynamic filtering

ESA UNCLASSIFIED For Official Use

Microsoft HoloLens on the ISS

Astronaut Scott Kelly had a live Skype call with earth from the ISS and used the Project Sidekick app in space

Microsoft HoloLens – Windows Mixed Reality

Untethered, self-contained with built-in computing, sensors to sense the environment and semi-transparent displays

Microsoft HoloLens – Windows Mixed Reality

Untethered, self-contained with built-in computing, sensors to sense the environment and semi-transparent displays

HoloBeam – Immersive Telepresence

Real-time interactions and collaboration

The Age of AI

Deep Learning is going to make specialized depth cameras obsolete

The Age of AI

Deep Learning real-time inference for object recognition and semantic understanding

“People are the killer app”

Charlie Fink
Futurist, author and Forbes columnist
